

COMMITMENTS:

THERE ARE NO COMMITMENTS ON THIS PROJECT

GENERAL NOTES:

- Stations and elevations on this project are for reference only.
- SECTION A - WORKING HOURS: No construction activities, construction equipments or workers will be allowed on I-74 between the hours of 6:15am to 8:30am and from 3:30pm till 5:30pm Monday through Friday.
- Due to other construction activities close to this project; contractor shall coordinate all construction activities as to not interfere with other projects. See special provisions for " cooperation with other contractors " requirements
- If the contractor elects to work during night time hours; Highway Standard 701401 shall utilize direction indicator drums with steady burn monodirectional light. Highway Standard 701406 may be utilized during
- At structure parapet wall; if the contractor removes existing guardrail and is unable to reinstall the new one until the next working day, Temporary Impact Attenuators must be used
- For Steel Plate Beam Guardrail installation; the contractor will have the options of either driving posts through or coring- out a hole for posts. Any damages to the proposed or existing shoulders will be fixed at the contractor's expense. The contractor shall correct any damages to the satisfaction of the engineer.
- During working hours:
All vehicles and equipments shall be parked on the median shoulder, as far away from the centerline as possible.

Construction vehicles will not be allowed to utilize the U-Turns within or near the project limits.

All vehicles shall exit through the downstream end of the lane closure.

If this cannot be accommodated, a flagger with lighting shall be placed in advance of the exiting vehicles. Cost shall be included in the traffic control items
- During Non-Working Hours:
All equipments and/or materials must be located a minimum of 50' from the edge of traveled way or protected behind guardrail from all East bound, West bound and ramp traffic
- Temporary Erosion Control Seeding is included in this contract to seed a new earth shoulders, side slopes, and ditches during times periods when permanent seeding is not allowed. Some or all of the temporary erosion control seeding may be deleted if permanent seeding is placed in a timely manner.

- The contractor shall be responsible for protecting utility property from construction operations as outlined in article 107.31 of the Standard Specifications. Any damage to the under ground facilities caused by the contractor shall be repaired to the satisfaction of the department at the contractor's expense, including temporary repairs which may be required to keep the facility operational while material is being obtained to make permanent repairs
- Manufacture Specification for the H.T.C.M.B. shall be in compliance with lines and grades shown on the plans. Post Foundation shall be prepared as to manufacture's recommendations. Posts shall be placed on center based on manufacture's recommendations to achieve a deflection not greater than 9.2 feet . Reflective caps shall be placed on the posts at the same spacing as raised reflective markers are placed on the adjacent pavement. reflective caps shall not be measured for payment and shall be included in the contract unit price per foot for "High Tension Cable Median Barrier". All H.T.C.M.B. hardware used on this project shall meet test level-4

204.00 ENVIRONMENTAL REVIEWS

Prior to the use of any proposed borrow areas, use areas (temporary access roads, detours, run-arounds, etc.) and/or waste areas, the Contractor shall file the required environmental resource request surveys according to Section 107.22 of the Standard Specifications. These surveys are required in order for the Department to conduct cultural and biological resource surveys for the proposed site.

Prior to any waste materials being removed from the construction site the required environmental resource surveys will need to be obtained and filed by the Contractor. Excess waste products removed from the construction site shall be disposed of as required in Section 202.03 of the Standard Specifications.

Any protruding metal bars shall be removed prior to the disposal of broken concrete at approved disposal sites.

The required environmental resource documentation shall include the following:

- * BDE Form 2289 (Environmental Survey Request)
- * A location map showing the size limits and location of the use area
- * Signed property owner agreement form-D4 P10100
- * Color photographs depicting the use area
- * Borrow Area Entry Agreement form-D4 P10101

Please note that a minimum of two weeks shall be allowed for the District to obtain the required environmental clearances.

Mixture Use(s):	Bituminous Shoulder (Top Lift)	Bituminous Shoulder (Bottom Lift)
AC/PG:	PG 64-22	PG 64-22
RAP% (Max): **	30%	30%
Design Air Voids:	3.0% @ N=30	4.0% @ N=30
Mixture Composition: (Gradation Mixture)	IL 9.5L	IL 19.0L
Friction Aggregate:	Mix C	N.A.

670.00 ENGINEERS FIELD OFFICE

Add the following sentence to the end of paragraph 670.02 (i) and 670.04 (e):
All of the telephone lines provided shall have unpublished numbers.
