HYDRAULIC REPORT OUTLINE (HRO)

In order to facilitate a more efficient and timely approval of Hydraulic Reports, a "Hydraulic Report Outline" shall be prepared and submitted with each hydraulic project. This Outline shall be submitted to the District Hydraulic Engineer along with the Hydraulic Report to aid in review of the report.

If any deviations from the procedural steps below are necessary, they must be documented in the outline. Hydraulic Reports prepared by a Qualified District Hydraulic Engineer or under his supervision, are exempt from the HRO requirement. To facilitate Pump Station Hydraulic Report reviews, the Checklist and Data Sheets from the IDOT Drainage Manual, 13-303 and 13-304, will be used. The Data Sheets must be signed by the consultant's QA/QC person or the District Hydraulic Engineer.

1. SN ___-___ (Existing); SN ___-___ (Proposed)
   Route/Stream: EOWB over Bensenville Ditch
   County: DuPage/Chicago

2. Prepared By: ☒ Consultant: Christopher B. Burke Engr., Ltd.
   ☐ District ____

3. Chapter 2 of the IDOT Drainage ☒ Yes ☐ No
   If no, explain ____
   Completed checklist (2-701.02) must be attached.

4. Design Considerations:
   a. Backwater limitations due to:
      IDNR Individual or Floodway Permit ☒ Yes ☐ No
      Sensitive Flood Receptor(s) ☐ Yes ☒ No
   b. Does proposed average design velocity through the structure exceed natural channel velocities? ☐ Yes ☒ No
   c. Is the clearance policy met? ☐ Yes ☐ No
   d. Is the freeboard policy met? ☒ Yes ☐ No

5. Project scope (check all that apply):
   a. ☐ Complete replacement.
   b. ☐ Superstructure replacement.
   c. ☐ Superstructure replacement and/or widening; Length of pier extension in the water, upstream ____ft., downstream ____ft.
   d. ☐ Bridge ☒ Culvert
   e. ☒ New alignment
   f. Work planned below Q100 HWE: ☐ Yes ☐ No

6. Hydrology: ☐ USGS ☒ FIS ☒ Other IDNR-OWR approved flowrates
   Gage data utilized? ☐ Yes ☒ No

7. WIT: Attached copy of all completed WIT(s) ☒ Yes ☐ No ____

8. Modeling:
   a. ☒ HEC RAS ☐ WSPRO ☐ Other _____
   b. N-values estimated according to Chapter 5 of Drainage Manual? ☒ Yes ☐ No
   c. Source of starting WSE FIS Flood Elevations
   d. Non-IDOT encroachments in survey? ☐ Yes ☒ No
      If yes, are they accounted for? ☐ Yes ☐ No
   e. Tail water controls(s)? ☐ Yes ☒ No
      If yes, list: _____
      Properly addressed? ☐ Yes ☐ No
   f. Expansion/Contraction cones addressed per Chapter 7 of Drainage Manual? ☒ Yes ☐ No
      If N/A, explain: _____

9. IDNR-OWR Permit: Drainage Area _ sq. mi.; ☐ Rural; ☒ Urbanizing;
   Public Water or within Public Water boundaries ☐ Yes ☒ No
   Indicate Permit Type Required:
   a. Individual ☒
   b. Statewide #2 ☐
   c. Statewide #12 ☐
   d. Floodway ☐
   e. Other: _____
   f. None: ☐

10. Sensitive flood receptors ☐ Yes ☒ No
    Give type, elevations and locations: _____

    History of flooding or overtopping problems: Yes ☐ No ☒
    Sources of observed highwater: N/A

11. Scour/migration problems: ☒ None/minimal ☐ Significant ☐ Severe
    Comments: _____

    Ice/Debris concerns: None/minimal ☒ Significant ☐ Severe ☐
    Comments: _____

    Countermeasures proposed: _____

12. Deviations from the general procedures presented above and in Chapters 6 and 7 of the Drainage Manual: _____
    (Attach supporting documents if necessary)

Prepared by: Donald Oliphant Date: December 12, 2011

Signed: (AQ/QC) _____ Date: 4/19/12

Hydraulic Report Checklist

The District or Consultant should complete the following checklist before submitting the Hydraulic Report for approval.

1. ☒ Title Page
2. ☒ Table of Contents
3. ☒ Narrative - (as outlined in Section 2-601.01 Item #3)
4. ☒ Waterway Information Table (WIT) - (as outlined in Section 2-601.01 Item #4)
5. ☒ Hydraulic Report Data Sheets
6. ☒ Location Map - should show the subject structure along with nearby location defining landmarks (cities, roads, highways, etc.)
7. ☒ USGS Hydraulic Investigation Map (District 1 only)
8. ☒ Photographs - (Minimum: U/S & D/S Structure Faces, Up & Down Channel, Up & Down Roadway Across Structure)
9. ☐ Hydrology (map and calculations)
10. ☒ Streambed Profile
11. ☒ Roadway Profile (existing and proposed)
12. ☒ Cross Section Plots - with plan layout preferably overlayed upon an aerial photo with the contours
13. ☒ Bridge Opening Plots
14. ☒ Natural Condition Analysis
15. ☒ Existing Condition Analysis
16. ☒ Proposed Condition Analysis

When HEC-RAS modeling is being used, ALL Plans (Natural, Existing, & Proposed) shall be included in ONE Project File.

17. ☐ Scour Analysis – Existing and Proposed Conditions
18. ☒ Compensatory Storage Calculations (if required)
19. ☒ Survey Notes (if available, No Electronic Point Files)
20. ☐ Correspondence Notes
21. ☒ CD with Project Files (Include pdf copy of the Hydraulic Report)

Tab 1

SECTION 1

NARRATIVE
WEST BYPASS OVER BENSENVILLE DITCH

NARRATIVE

Project Description

The Elgin O'Hare – West Bypass (EOWB) study area encompasses nine (9) watersheds: West Branch DuPage River, Spring Brook, Meacham Creek, Salt Creek, Willow Creek, Higgins Creek, Bensenville Ditch, Silver Creek, and Addison Creek. The length of the expressway and interchanges to be improved is approximately 50 miles, including the Elgin O'Hare Expressway and Thorndale Avenue approximately from Gary Avenue to York Road, I-90 approximately from Arlington Heights Road to Wolf Road, and I-294 approximately from North Avenue to Mannheim Road. It is estimated that approximately 25 miles of arterials and frontage roads also will be included in the study. A general project location map is included in Section 3 of this report.

The hydraulic report is submitted for the impacted structures located within the Bensenville Ditch watershed. Separate hydraulic reports for impacted structures within each of the other watersheds are concurrently being prepared.

This hydraulic report documents the hydraulic conditions of the Bensenville Ditch at the proposed Elgin O'Hare-West Bypass in the City of Chicago. The USGS Hydrologic Investigations Atlas and Flood Insurance Rate Map included in Section 3 show the future structure location.

Site Description

The site in the vicinity of the proposed crossing is located within the City of Chicago O'Hare International Airport property. The O'Hare Modernization Program (OMP) has reserved a 300 feet wide corridor for the future EOWB project on the western portion of the airport. This report is being completed under the assumption the ultimate Airport Layout Plan (ALP) of the Bensenville Ditch will be active. This alignment was approved by the Illinois Department of Natural Resources – Office of Water Resources (IDNR-OWR) through Permit No. NE2010055, dated November 24, 2010. This permit is included in Section 15. It is anticipated that this alignment will be active by the end of 2012. The surrounding area has been recently demolished and consists primarily of open area and sparse roadways.

Field Observations

Direct access to this area is limited to aerial photography due to security measures on the O'Hare International Airport property. However, several photographs of the area are included with permission by the OMP personnel. The photographs were taken on June 16, 2010. An aerial photograph of the area and all photographs are provided in Section 4.

Stream Survey

No stream survey was completed as part of the EOWB project at this future crossing. Proposed cross-sections and stream profiles of the future alignment of the Bensenville Ditch are used as existing conditions of the EOWB project, which are based on the NGVD 1929 datum.

Datum Correlation

A datum correlation is required between the IDOT datum used for the survey and the NGVD 1929 datum used in the HEC-RAS modeling. The IDOT datum and EOWB roadway plans are based on the NAVD 1988 datum.

The vertical datum conversion factor at EOWB was determined to be -0.295 feet (-0.3 feet) added to the NGVD 1929 datum to equate to the NAVD 1988 vertical datum. The conversion value was calculated using the National Oceanic and Atmospheric Administration (NOAA) National Geodetic Survey (NGS) VERTCON online conversion tool. A copy of the VERTCON output is included in Section 14.

The Baseline Conditions, Existing Conditions, and Natural Conditions HEC-RAS models are based on NGVD 1929 datum; Waterway Information Tables (WITs) are based on the NAVD 1988 datum.

Historical Flooding

The best available historical flooding data was taken from the Elmhurst Quadrangle Hydrologic Investigations Atlas (1963 – HA-68). The maximum known high water level per the Hydrologic Investigations Atlas is approximately 663.0 feet during the October 1954 event. The USGS Profiles of Floods on Bensenville Ditch are provided in Section 3.

Other significant storm events within the Bensenville Ditch watershed occurred in August 1987, September 2008, and July 2010. However, due to a lack of rainfall data or stream gages within the Bensenville Ditch watershed, significant data could not be obtained.

Sensitive Flood Receptors

There are no sensitive flood receptors located within the vicinity of this crossing.

Other Studies and Reports

The OMP has completed numerous studies within the Bensenville Ditch watershed to coincide with different phasing of airport construction. As previously stated, the OMP received a Floodway Construction Permit (No. NE2010055) from IDNR-OWR for the ultimate alignment of the Bensenville Ditch. This Floodway Construction permit is included in Section 13. CBBEL completed a Phase 1 hydraulic report for a grade separation project at Irving Park Road and York Road. This project is discussed in further detail under the Hydraulic Analysis section.

Hydrology

Flow rates used for this analysis were taken from the IDNR-OWR Floodway Construction Permit No. NE2010055.

Hydraulic Analysis

The OMP has completed numerous construction projects within the waterway and watershed of Bensenville Ditch. Therefore, the hydrologic and hydraulic models for Bensenville Ditch have been significantly modified over the last few years. A plan and profile of the ultimate alignment of the Bensenville Ditch is provided in Section 5. This alignment should be activated sometime in the Fall of 2012. The OMP hydraulic modeling is considered best available information at this time. This updated modeling also includes a project outside of the OMP for the IDOT grade separation of York Road and Irving Park Road. HDR, Inc. is the IDOT Phase 2 consultant for the York Road/Irving Park Road grade separation project. HDR Inc. has incorporated their proposed stream modifications into this model upstream of the EOWB corridor (From River Sta. 8.910 to Sta. 8.962). These modifications include the addition of four-celled 10 feet wide by 7 feet high RCBC and extension of the York Road twin-celled 10 feet wide by 7 feet high RCBC west of the crossing. While these proposed improvements have not been approved by INDR-OWR at this time, it is understood they will be in place when the EOWB crossing is constructed.

Prior to the OMP, the FEMA FIS for Bensenville Ditch began at the DuPage County border just downstream of Orchard Avenue. Floodplain areas within Cook County and the City of Chicago were shown as Zone A with no associated FIS data.

Revisions to the effective HEC-2 hydraulic model began in 2003 when the OMP began design projects that reduced the watershed area to Bensenville Ditch. Over the next 9 years, the OMP has completed several phases further reducing the watershed area and changing the alignment of the watercourse to what is currently under construction and referred to as the ultimate alignment. Approximately 1.16 square miles of tributary has been removed from the Bensenville Ditch Watershed since the beginning of the OMP project (4.03 to 2.87 square miles). OMP improvements included in the ultimate alignment begin upstream of Taft Road.

Natural/Existing/Baseline Conditions Models

The natural, existing, and baseline conditions models will be identical since there is no structure at the future location of the EOWB crossing. These models will serve as the permit/design models for the future crossing. Manning's "n" values for the hydraulic model are reflective of approved conditions by IDNR-OWR. The Bensenville Ditch will be a newly constructed grass-lined channel in good condition. The existing conditions HEC-RAS output is provided in Section 9. Tables 1A-1C compare natural conditions and existing conditions water surface elevations for all modeled storm events.

[1] NGVD 1929
[2] Approximate future crossing location

The 500-year recurrence interval information provided on the WIT was estimated using a log-log plot of approved flowrates and a best fit curve. This estimated flowrate was then input in a truncated HEC-RAS model of the crossing to determine created head and headwater elevations. Back-up calculations for the 500-year recurrence interval have been included in Sections 2, 8, and 11.

Proposed Conditions Model

The existing conditions model was revised to include the proposed structure beneath the EOWB embankment. Due to the proximity of the EOWB corridor to the UPRR embankment a separate structure is not possible. Therefore, the existing 137 feet long UPRR triple-celled 10 feet wide by 6 feet high RCBC will be extended downstream. The resultant structure will be approximately 504 feet long. A plan view of the ultimate alignment has been included in Section 5 as Exhibit 7 to show all cross-section locations. Cross-sections 8.830, 8.852, and 8.864 were removed since they were within the culvert extension section. Cross-sections 8.826 and 8.827 were added to represent downstream approach and face of the new culvert. The overall reach length of the model was not revised. Table 2A through Table 2C summarizes a comparison between existing/natural and proposed conditions.

[1] NGVD 1929
[2] Drop in WSE attributed to increased culvert opening

Decreases in resultant water surface elevations can be attributed to the increased opening of the proposed culvert relative to the existing cross-section area. Since this hydraulic report summarizes the proposed extension of the existing UPPR culvert, burying the culvert to promote fish passage or environmental habitat is not feasible since the upstream section will already be in place. The profile over the culvert extension represents the UPPR since it is thought to be lower than the EOWB profile. A WIT table has been provided in Section 2. WITs for the future CPRR and York have been provided by IDOT are included in Section 2. These

WITs have been included directly from the Phase 2 grade separation report from HDR. No changes are anticipated to these WITs.

Compensatory Storage/Permit Requirements

The EOWB embankment will be constructed within the future floodplain of Bensenville Ditch. The future floodplain in this vicinity will be contained within the channel banks to minimize the required compensatory storage for the crossing. The floodplain and floodway will be concurrent through this section. Due to a consistent typical section through the crossing, the proposed floodplain fill volume was determined by averaging the upstream and downstream existing cross-section areas. The proposed floodplain fill and compensatory storage volumes are summarized below.

- Floodplain Fill minus Culvert Volume
  - Normal to 10-Yr
    - Fill with no Culvert – 0.74 ac-ft
    - Proposed Culvert Volume – 0.80 ac-ft
    - No Compensatory Storage Required
  - 10 to 100-Yr
    - Fill with no Culvert– 0.89 ac-ft
    - Proposed Culvert Volume – 0.55 ac-ft
    - Required Compensatory Storage at 1.5:1 – 0.51 ac-ft
- Compensatory Storage
  - Normal to 10-Yr – 0.10 ac-ft (D/S of Culvert in Proposed basin)
  - Normal to 10-Yr – 0.06 ac-ft (Excess Volume in Culvert)
  - 10 to 100-Yr – 0.69 ac-ft (D/S of Culvert in Proposed basin)

Compensatory storage will be met incrementally at a 1.5:1 ratio in accordance with DuPage County regulations. The normal to 10-Yr compensatory storage requirement will be met due to the construction of the proposed culvert extension. However, total compensatory storage requirements between 10-year and 100-year flood elevations cannot be met within the EOWB corridor. The remaining compensatory storage required for this crossing would be provided downstream within the O'Hare International Airport property. For purposes of this report, small compensatory storage areas have been proposed downstream of the culvert extension. This location is shown on an exhibit in Section 12

This development will meet requirements for an individual permit through the Illinois Department of Natural Resources – Office of Water Resources (IDNR-OWR). No floodway is currently in the vicinity of this project. IDNR-OWR permit summary and compensatory storage calculations are included in Section 12.

Scour Analysis

No scour analysis was completed since the proposed structure is a culvert.

Conclusion and Design Requirements

The proposed EOWB cross culvert has the following design parameters:

- The existing 137 feet long triple 10 feet (span) by 6 feet (height) RCBC structure will be extended 367 feet downstream to accommodate the West Bypass embankment,
- The resultant structure is a 504 feet long triple 10 feet (span) by 6 feet (height) RCBC

In order to facilitate the IDOT review, a "Hydraulic Report Outline" for the EOWB structure is included at the beginning of the report. The proposed culvert crossing extension is sized to meet the following criteria:

- The 50-year headwater elevation of 658.21 feet (NAVD 1988) is lower than the culvert crown elevation of 659.47 feet (NAVD 1988),
- The 50-year freeboard of 29.02 feet to the proposed edge of pavement (EOP) is greater than the 3 feet requirement.

Run Date and Time: 4/2/2012 9:39:16 AM

Project in English units

PLAN DATA

Plan Title: Ex_Nat_112311
Plan File : C:\Users\doliphant\Desktop\2007\Bensenville Ditch\models\HEC-RAS Updated 112311\112311.p02

Geometry Title: Ex_Nat_112311
Geometry File : C:\Users\doliphant\Desktop\2007\Bensenville Ditch\models\HEC-RAS Updated 112311\112311.g02

Flow Title : EX/NAT_Condition_Flows
Flow File : C:\Users\doliphant\Desktop\2007\Bensenville Ditch\models\HEC-RAS Updated 112311\112311.f02

Plan Description:
Flows From Burke's "ALP Alignment - Bensenville Ditch, 04/2010 - FINAL"

Plan Summary Information:
Number of: Cross Sections = 105 Multiple Openings = 0
Culverts = 8 Inline Structures = 0
Bridges = 2 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.003
Critical depth calculation tolerance = 0.003
Maximum number of iterations = 20
Maximum difference tolerance = 0.1
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: Between every coordinate point (HEC2 Style)
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

ERRORS WARNINGS AND NOTES
Errors Warnings and Notes for Plan : EX_NAT

River: Bensenville Ditc Reach: US Reach RS: 9.635 Profile: 100-Year

Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.557 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 100-Year Upstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 100-Year Downstream
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.555 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.541 Profile: 100-Year
Warning:The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.527 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.522 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.522 Profile: 100-Year Culv: Box7
Warning:During the supercritical analysis, the program could not balance the energy equation during the forewater calculations inside of the culvert. The program assumed critical depth at the outlet and continued on.
Warning:During supercritical flow in the culvert, a comparison of the energy at the outlet to the energy at critical depth in the downstream cross section reveals that a supercritical answer is not possible. The downstream cross section has defaulted to critical depth. For best results, this profile should be run in a mixed flow regime.
Note: The flow in the culvert is entirely supercritical.
River: Bensenville Ditc Reach: US Reach RS: 9.517 Profile: 100-Year
Warning:The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.506 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.476 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.366 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.267 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.255 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.2505 Profile: 100-Year Culv: Box6
Warning:During the culvert inlet computations, the program could not balance the culvert/weir flow. The reported inlet energy grade answer may not be valid.
River: Bensenville Ditc Reach: US Reach RS: 9.246 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.24 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.197 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.189 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.186 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.171 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.02 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.001 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.972 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.962 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.943 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.937 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.932 Profile: 100-Year Culv: Culvert #1
Warning:During subcritical analysis, with the exit loss set =1.0, the projected WSEL in culvert has a lower energy than the downstream energy. Most likely, the downstream cross section blocks part of the culvert or the ineffective area is set too far in. Instead of projecting the WSEL, the program did an energy balance to get the WSEL inside the culvert at the downstream end.
River: Bensenville Ditc Reach: US Reach RS: 8.91 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.9 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.888 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.864 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.830 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.

River: Bensenville Ditc Reach: US Reach RS: 8.820 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.743 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.579 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.555 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.546 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.58 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.122 Profile: 100-Year
Warning:The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 7.111 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.077 Profile: 100-Year
Warning:The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.875 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.838 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.799 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.649 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.636 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.611 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.597 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.573 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.557 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.554 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.551 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.535 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.516 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.513 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 100-Year
Note: Yarnell answer is not valid if the water surface is above the low chord or if there is weir flow. The Yarnell answer has been disregarded.
Note: The downstream water surface is above the minimum elevation required for orifice flow. The orifice flow equation was used for pressure flow.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 100-Year Upstream
Note: For the cross section inside the bridge at the upstream end, the water surface and energy have been projected from the upstream cross section. The selected bridge modeling method does not compute answers inside the bridge.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 100-Year Downstream
Note: For the cross section inside the bridge at the downstream end, the water surface and energy have been projected from the downstream cross section. The selected bridge modeling method does not compute answers inside the bridge.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.481 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.

TAB 9

SECTION 9

EXISTING CONDITIONS ANALYSIS

The natural, existing, and baseline conditions models will be identical since there is no structure at the future location of the EOWB crossing.

TAB 10

SECTION 10

NATURAL CONDITIONS ANALYSIS

The natural, existing, and baseline conditions models will be identical since there is no structure at the future location of the EOWB crossing.

PLAN DATA

Plan Title: Proposed Conditions 101612
Plan File : c:\Users\doliphant\Desktop\2007\Bensenville Ditch\models\HEC-RAS Updated 112311\112311.p08

Geometry Title: Prop_101612
Geometry File : c:\Users\doliphant\Desktop\2007\Bensenville Ditch\models\HEC-RAS Updated 112311\112311.g08

Flow Title : Final_Condition_Flows
Flow File : c:\Users\doliphant\Desktop\2007\Bensenville Ditch\models\HEC-RAS Updated 112311\112311.f01

Plan Description:
Flows From Burke's "ALP Alignment - Bensenville Ditch, 04/2010 - FINAL"

Plan Summary Information:
Number of: Cross Sections = 104 Multiple Openings = 0
Culverts = 8 Inline Structures = 0
Bridges = 2 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.003
Critical depth calculation tolerance = 0.003
Maximum number of iterations = 20
Maximum difference tolerance = 0.1
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: Between every coordinate point (HEC2 Style)
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

ERRORS WARNINGS AND NOTES
Errors Warnings and Notes for Plan : PROP 101612

River: Bensenville Ditc Reach: US Reach RS: 9.635 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.635 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.635 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.635 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 9.557 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.557 Profile: 10-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.557 Profile: 2-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.557 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 100-Year Upstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 100-Year Downstream
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 10-Year Upstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 10-Year Downstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 2-Year Upstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 2-Year Downstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 50-Year Upstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.556 Profile: 50-Year Downstream
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.

Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 9.522 Profile: 100-Year Culv: Box7
Warning:During the supercritical analysis, the program could not balance the energy equation during the forewater calculations inside of the culvert. The program assumed critical depth at the outlet and continued on.
Warning:During supercritical flow in the culvert, a comparison of the energy at the outlet to the energy at critical depth in the downstream cross section reveals that a supercritical answer is not possible. The downstream cross section has defaulted to critical depth. For best results, this profile should be run in a mixed flow regime.
Note: The flow in the culvert is entirely supercritical.
River: Bensenville Ditc Reach: US Reach RS: 9.522 Profile: 10-Year Culv: Box7
Warning:During subcritical analysis, with the exit loss set =1.0, the projected WSEL in culvert has a lower energy than the downstream energy. Most likely, the downstream cross section blocks part of the culvert or the ineffective area is set too far in. Instead of projecting the WSEL, the program did an energy balance to get the WSEL inside the culvert at the downstream end.
River: Bensenville Ditc Reach: US Reach RS: 9.522 Profile: 2-Year Culv: Box7
Warning:During subcritical analysis, with the exit loss set =1.0, the projected WSEL in culvert has a lower energy than the downstream energy. River: Bensenville Ditc Reach: US Reach RS: 8.827 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.827 Profile: 50-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.826 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.826 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.826 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.826 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.820 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.820 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.820 Profile: 2-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.820 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.743 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.743 Profile: 10-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.743 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.743 Profile: 50-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 8.579 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.579 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.579 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.579 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.555 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.555 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 8.546 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.546 Profile: 10-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.546 Profile: 2-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.546 Profile: 50-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 8.000 Profile: 10-Year Culv: Culvert #1
Note: During subcritical analysis, the culvert direct step method, the solution went to normal depth.
River: Bensenville Ditc Reach: US Reach RS: 8.000 Profile: 2-Year Culv: Culvert #1
Note: During subcritical analysis, the culvert direct step method, the solution went to normal depth.
River: Bensenville Ditc Reach: US Reach RS: 8.000 Profile: 50-Year Culv: Culvert #1
Note: During subcritical analysis, the culvert direct step method, the solution went to normal depth.
River: Bensenville Ditc Reach: US Reach RS: 7.58 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.58 Profile: 10-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.58 Profile: 2-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.58 Profile: 50-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.122 Profile: 100-Year
Warning:The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 7.122 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 7.111 Profile: 100-Year

Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.111 Profile: 10-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.111 Profile: 2-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.111 Profile: 50-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.077 Profile: 100-Year
Warning:The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.077 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.077 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.077 Profile: 50-Year
Warning:The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 7.059 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 7.059 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 7.027 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 7.001 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.932 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.932 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.925 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.875 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.875 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.875 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.875 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.838 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.838 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.838 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.838 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.799 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.799 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.799 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.799 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.649 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.649 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.649 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.649 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.648 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.636 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.636 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.

This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.636 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.636 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.611 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.611 Profile: 10-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.611 Profile: 2-Year
Warning:Divided flow computed for this cross-section.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.611 Profile: 50-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.597 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.597 Profile: 10-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.597 Profile: 2-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.597 Profile: 50-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.573 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.573 Profile: 10-Year
Warning:Divided flow computed for this cross-section.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.573 Profile: 2-Year
Warning:Divided flow computed for this cross-section.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.573 Profile: 50-Year
Warning:Divided flow computed for this cross-section.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.557 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.557 Profile: 10-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.557 Profile: 2-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.557 Profile: 50-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.554 Profile: 100-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.554 Profile: 10-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.554 Profile: 2-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.554 Profile: 50-Year
Warning:Divided flow computed for this cross-section.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, water surface was used.
River: Bensenville Ditc Reach: US Reach RS: 6.551 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.551 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.

This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.551 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.551 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.535 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.535 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.535 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.535 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.516 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.516 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.516 Profile: 2-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.516 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
River: Bensenville Ditc Reach: US Reach RS: 6.513 Profile: 100-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.513 Profile: 10-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.513 Profile: 2-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.513 Profile: 50-Year
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 100-Year
Note: Yarnell answer is not valid if the water surface is above the low chord or if there is weir flow. The Yarnell answer has been disregarded.
Note: The downstream water surface is above the minimum elevation required for orifice flow. The orifice flow equation was used for pressure flow.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 100-Year Upstream
Note: For the cross section inside the bridge at the upstream end, the water surface and energy have been projected from the upstream cross section. The selected bridge modeling method does not compute answers inside the bridge.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 100-Year Downstream
Note: For the cross section inside the bridge at the downstream end, the water surface and energy have been projected from the downstream cross section. The selected bridge modeling method does not compute answers inside the bridge.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 10-Year
Note: Yarnell answer is not valid if the water surface is above the low chord or if there is weir flow. The Yarnell answer has been disregarded.
Note: The downstream water surface is above the minimum elevation required for orifice flow. The orifice flow equation was used for pressure flow.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 10-Year Upstream
Note: For the cross section inside the bridge at the upstream end, the water surface and energy have been projected from the upstream cross section. The selected bridge modeling method does not compute answers inside the bridge.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 10-Year Downstream
Note: For the cross section inside the bridge at the downstream end, the water surface and energy are based on critical depth over the weir.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 2-Year
Note: Yarnell answer is not valid if the water surface is above the low chord or if there is weir flow. The Yarnell answer has been disregarded.
Note: The downstream water surface is above the minimum elevation required for orifice flow. The orifice flow equation was used for pressure flow.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 2-Year Upstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 2-Year Downstream
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 50-Year
Note: Yarnell answer is not valid if the water surface is above the low chord or if there is weir flow. The Yarnell answer has been disregarded.
Note: The downstream water surface is above the minimum elevation required for orifice flow. The orifice flow equation was used for pressure flow.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 50-Year Upstream
Note: For the cross section inside the bridge at the upstream end, the water surface and energy have been projected from the upstream cross section. The selected bridge modeling method does not compute answers inside the bridge.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.497 Profile: 50-Year Downstream
Note: For the cross section inside the bridge at the downstream end, the water surface and energy have been projected from the downstream cross section. The selected bridge modeling method does not compute answers inside the bridge.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.481 Profile: 100-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.481 Profile: 10-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.481 Profile: 2-Year
Warning:Divided flow computed for this cross-section.
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Note: Multiple critical depths were found at this location. The critical depth with the lowest, valid, energy was used.
River: Bensenville Ditc Reach: US Reach RS: 6.481 Profile: 50-Year
Warning:The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.

Flow Title : 500-Yr
Flow File : c:\Users\doliphant\Desktop\2007\Bensenville Ditch\models\HEC-RAS Updated 112311\112311.f03

Plan Description:
Flows From Burke's "ALP Alignment - Bensenville Ditch, 04/2010 - FINAL"

Plan Summary Information:
Number of: Cross Sections = 5 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.003
Critical depth calculation tolerance = 0.003
Maximum number of iterations = 20
Maximum difference tolerance = 0.1
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: Between every coordinate point (HEC2 Style)
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

SECTION 12

IDNR-OWR FLOODWAY PERMIT SUMMARY AND COMPENSATORY STORAGE SUMMARY

Illinois Department of Transportation

Permit Summary for Floodway Construction in Northeast Illinois

Applicant Agency:	Illinois Department of Transportation	County:	DuPage
Route:	Elgin O'Hare-West Bypass	Stream:	Bensenville Ditch
Section:	EOWB over Bensenville Ditch	SN:	TBD

General Description (bridge length, bridge width, number of spans, abutment type, proposed scope of work within floodway, etc.): Extend existing 3 – 10'W by 6'H RCBC 367 ft. downstream.
Existing Facility: No existing structure
Proposed Improvement: Extend the existing UPRR culvert 367 ft. downstream.

1. Is the proposed work classified as repairs such as deck replacement, pavement resurfacing, or the armoring or filling of a scour hole? ☐ Yes ☒ No

2. Does the proposed work only consist of modifications to the existing structure which will occur above the regulatory 100-year flood profile? ☐ Yes ☒ No

Note: If the answer to question 1 or 2 is yes, no permit is required and questions 3 through 12 may be omitted.

3. Does the proposed work below the regulatory 100-year flood profile consist of widening of the existing structure by 12 feet or less? ☐ Yes ☒ No

Note: If yes, Regional Permit No. 2 applies and questions 4 through 9 may be omitted.

4. Is the proposed improvement, including the approach roadway, more restrictive to normal and flood flows than the existing structure? ☐ Yes ☒ No

5. Is a Channel Modification proposed? ☐ Yes ☒ No

6. Are there any buildings or structures located upstream in the 100-year floodplain within the influence of the structure backwater? ☐ Yes ☒ No

   6a. If no, does the backwater of the proposed improvement exceed the backwater of the existing structure by more than 0.1 foot? ☐ Yes ☐ No

   6b. If yes, does the proposed backwater exceed the natural high water elevation by more than 0.1 foot? ☐ Yes ☐ No

7. Are transitions required for this project? ☐ Yes ☒ No

8. Is the flood profile at the project site impacted by backwater from a downstream receiving stream? ☐ Yes ☒ No

   If yes, list frequency of starting elevation for analysis:

9. Is backwater from a downstream structure affecting the flood profile at the project site? ☐ Yes ☒ No

9a. Was the existing downstream structure used in the analysis for determining flood profile at the project site? years? (Attach documentation) ☒ Yes ☐ No

9b. Is the downstream structure scheduled for improvement in the next 5 ☐ Yes ☒ No

9c. Was the proposed downstream improvement used in the analysis? ☐ Yes ☒ No

10. Is a floodway map change required due to the proposed project? ☐ Yes ☒ No

11. Will fill or material be placed in the floodway due to the proposed work? ☒ Yes ☐ No

11a. If yes, is compensatory storage provided at the project location? (Attach a copy of completed Attachment A) ☒ Yes ☐ No

11b. If the answer to 11a is no, is compensatory storage provided at another location? If yes, give location and attach a copy of completed Attachment A. ☐ Yes ☐ No

11c. Has compensatory storage relief been granted? (Attach Documentation) ☐ Yes ☒ No

12. Coordination based on Memorandum of Agreement has occurred with Agency(ies) (Attach documentation):. ☐ Yes ☒ No

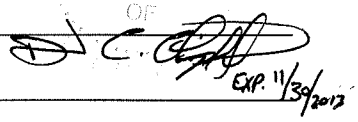
---

All engineering analysis has been performed by me or under my direct supervision.

Signature: 
IL/P.E. #: 062-059516

Date: 12/01/2011

P.E. Expiration Date: 11/30/2013



FOR DEPARTMENTAL USE ONLY

Is a permit required for this project? ☐ Yes ☐ No

If yes, specify type of permit: ☐ Floodway, ☐ Regional 1, ☐ Regional 2

Permit Summary
(Attachment A - Compensatory Storage)

Part of Permit Summary for Floodway Construction in Northeast Illinois:

☒ Phase I (Preliminary) ☐ Phase II (Final)

Applicant Agency:	IDOT	County:	DuPage
Route:	EOWB	Stream:	Bensenville Ditch
Section:	13	SN:	TBD

Provide the following information for Item 11:

a. Flood Water Elevations (Natural): (D/S Face, NGVD '29) 100-year 658.66 ft. 10-year 656.22 ft. Normal No NWL anticipated, No 7Q10 Flow

b. Determine the amount of fill or material being placed in the floodway:

1. Between the 100-year and 10-year flood elevation 548.5 cu. yds.
2. Between the 10-year and normal water elevation 0.0 cu. yds.

c. Determine the volume being provided to compensate for above item b: (i.e. from structures removal, excavation, etc.)

1. Between the 100-year and 10-year flood elevation 1113.2 cu. yds.
2. Between the 10-year and normal water elevation 258.1 cu. yds.

d. Mark on the exhibits the location and amount of compensatory storage to be excavated. Also show the location of floodway and floodplain boundaries. (Include a set of plans and cross sections)

Attach copy of calculations and Exhibit(s) reflecting the above finding.

All engineering analysis has been performed by me or under my direct supervision.

  * Assume Typical Section for calculations

			Taken from HEC-RAS Output: 10-YR Area	10-100 YR Area
Natural/Existing	U/S X-Section	8.852	99.3 ft²	192.1 - 99.3 = 92.8 ft²
	D/S X-Section	8.830	77.2 ft²	194.9 - 77.2 = 117.7 ft²

Floodplain Fill (Floodway & Floodplain are concurrent)

10-YR $\frac{(99.3+77.2)}{2}$ = 88.3 ft² * 367.5 ft = 32,450.3 ft³
0.74 AC-FT

100-YR $\frac{(92.8+117.7)}{2}$ = 105.3 ft² * 367.5 ft = 38,697.8 ft³
0.89 AC-FT

Compensatory Storage

* 10-YR
  (XS 8.852 → 657.01 - 653.57)
  U/S Face → 3.44 FT. DEEP
  D/S Face → 2.92 FT. DEEP
  (XS 8.830 → 656.22 - 653.30)
  $\frac{(3.44+2.92)}{2}$ = Average 3.18 FT
  3.18 FT x 3 BARRELS * 10 FT WIDE * 367.5 FT LONG = 35,059.5 FT³
  0.80 AF
* 100-YR
  (XS 8.852 →)
  U/S Face → 658.88 - 657.01 = 1.87 FT DEEP
  D/S Face → 658.66 - 656.22 = 2.44 FT DEEP
  (XS 8.830 →)
  Average = 2.16 FT
  2.16 FT * 3 BARRELS * 10 FT WIDE * 367.5 FT LONG = 23,814 FT³
  0.55 AF

Pat Quinn, Governor
Marc Miller, Director

Office of Water Resources • 2050 West Stearns Road • Bartlett, Illinois 60103

November 24, 2010

SUBJECT: Permit No. NE2010055
Channel/Floodway Relocation, Stream Enclosure and Culvert Crossing
Bensenville Ditch, Cook and DuPage Counties, Application No. 2010120

John Sisco
City of Chicago, O'Hare Modernization Program
P.O. Box 66848
10510 W. Zemke Road
Chicago, Illinois 60666

Dear Mr. Sisco:

Enclosed is Illinois Department of Natural Resources, Office of Water Resources Permit No. NE2010055 authorizing the subject project. This permit does not supersede any other federal, state or local authorizations that may be required for the project. Upon receipt and review of this permit and all conditions included therein, please properly execute and return the attached acceptance slip within sixty (60) days from the date of this permit.

Please be advised that the Illinois Department of Natural Resources, Office of Realty and Environmental Planning (OREP) participates in the regulatory programs of the U.S. Army, Corps of Engineers (USACE) and may review this project if a USACE Section 10 or 404 permit is required. Issuance of a permit by the Office of Water Resources does not preclude OREP's provision of comments and/or recommendations, primarily related to biological effects of the proposed action, to the USACE and other federal agencies concerning your project.

If any changes of the permitted work are found necessary, revised plans should be submitted promptly to this office for review and approval. Also, this permit expires on the date indicated in Condition (13). If unable to complete the work by that date, the permittee may make a written request for a time extension.

Please contact Bill Boyd of my staff at 847/608-3100, ext. 2025 if you have any questions.

Sincerely,

Gary Jereb

Gary W. Jereb, P.E., Chief
Northeastern Illinois Regulatory Programs Section

PERMIT NO. NE2010055
DATE: November 24, 2010

State of Illinois
Department of Natural Resources, Office of Water Resources

Permission is hereby granted to:

City of Chicago, O'Hare Modernization Program
P.O. Box 66848
10510 W. Zemke Road
Chicago, Illinois 60666

to relocate 9800 ft. of the channel and floodway, to construct a 4450 ft. long twin box stream enclosure, to construct a triple box culvert railroad crossing, and to construct a temporary channel on Bensenville Ditch in Section 13, Township 40 North, Range 11 East of the Third Principal Meridian in DuPage County and in the Southwest Quarter of Section 18, Township 40 North, Range 12 East of the Third Principal Meridian in Cook County,

in accordance with an undated application, and the plans and specifications entitled:

CHICAGO – O'HARE INTERNATIONAL AIRPORT, CITY OF CHICAGO, O'HARE MODERNIZATION PROGRAM, UPRR CENTRAL, IRVING PARK ROAD AND BENSENVILLE DITCH RELOCATIONS, COVER SHEET AND SHEETS CS-501 TO CS-512, CG-501 TO CG-512, ST-506, ST-508, ST-521, ST-522, AND XS-501 TO XS-530, DATED JULY 30, 2010, RECEIVED JULY 27, 2010, UPRR RELOCATION SOUTH OF IRVING PARK ROAD TO NORTH CONTRACT LIMIT, TITLE SHEET AND SHEETS CS-201 TO CS-203, DATED JUNE 11, 2010, RECEIVED JULY 27, 2010.

Examined and Recommended:

Gary W. Jereb, Chief
Northeastern IL Regulatory
Programs Section

Approval Recommended:

Gary R. Clark, Director
Office of Water Resources

Approved:

Marc Miller, Director
Department of Natural Resources

This PERMIT is subject to the terms and special conditions contained herein.

PERMIT NO. NE2010055

THIS PERMIT IS SUBJECT TO THE FOLLOWING CONDITIONS:

1) This permit is granted in accordance with the Rivers, Lakes and Streams Act "615 ILCS 5."

2) This permit does not convey title to the permittee or recognize title of the permittee to any submerged or other lands, and furthermore, does not convey, lease or provide any right or rights of occupancy or use of the public or private property on which the activity or any part thereof will be located, or otherwise grant to the permittee any right or interest in or to the property, whether the property is owned or possessed by the State of Illinois or by any private or public party or parties.

3) This permit does not release the permittee from liability for damage to persons or property resulting from the work covered by this permit, and does not authorize any injury to private property or invasion of private rights.

4) This permit does not relieve the permittee of the responsibility to obtain other federal, state or local authorizations required for the construction of the permitted activity; and if the permittee is required by law to obtain approvals from any federal or state agency to do the work, this permit is not effective until the federal and state approvals are obtained.

5) The permittee shall, at the permittee's own expense, remove all temporary piling, cofferdams, false work, and material incidental to the construction of the project. If the permittee fails to remove such structures or materials, the Department may have removal made at the expense of the permittee.

6) In public waters, if future need for public navigation or other public interest by the state or federal government necessitates changes in any part of the structure or structures, such changes shall be made by and at the expense of the permittee or the permittee's successors as required by the Department or other properly constituted agency, within sixty (60) days from receipt of written notice of the necessity from the Department or other agency, unless a longer period of time is specifically authorized.

7) The execution and details of the work authorized shall be subject to the review and approval of the Department. Department personnel shall have the right of access to accomplish this purpose.

8) Starting work on the activity authorized will be considered full acceptance by the permittee of the terms and conditions of the permit.

9) The Department in issuing this permit has relied upon the statements and representations made by the permittee; if any substantive statement or representation made by the permittee is found to be false, this permit will be revoked; and when revoked, all rights of the permittee under the permit are voided.

10) In public waters, the permittee and the permittee's successors shall make no claim whatsoever to any interest in any accretions caused by the activity.

11) In issuing this permit, the Department does not ensure the adequacy of the design or structural strength of the structure or improvement.

12) Noncompliance with the conditions of this permit will be considered grounds for revocation.

13) If the construction activity permitted is not completed on or before December 31, 2013 this permit shall cease and be null and void.

THIS PERMIT IS SUBJECT TO THE FOLLOWING SPECIAL CONDITIONS:

a) After completion of the work herein authorized, the permittee must submit to the Illinois Department of Natural Resources, Office of Water Resources Bartlett office and to the Federal Emergency Management Agency all the analyses, drawings, maps and other information needed for a Letter of Map Revision.

b) Stream flows shall not be diverted into the final relocated channel until it is vegetated and stabilized from erosion.
